

GMP TEMPERATURE MAPPING

1 DAY TRAINING COURSE

Master GMP Temperature Mapping with our expert-led course, ensuring regulatory compliance and optimal temperature control in pharmaceutical and healthcare settings.

GMP Temperature Mapping

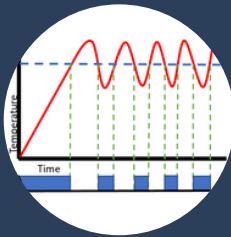

Documentation

- Regulations and Guidance
- Validation and Verification (IQ,OQ,PQ)
- Risk Assessment
- Periodic Review

Calibration

- How to review a Calibration Certificate
- Temperature Calibration
- Humidity Calibration

Temperature Mapping

- Sensor Selection
- Sensor Location and Placement
- Temperature Distribution / Penetration Testing
- Door Open, Power Failure, Pull Down Tests
- Low Volume Fill Products
- Developing Alarm System Sensor Locations

Controlled Temperature Units (CTUs)

- Liquid Nitrogen Storage
- Ultra Low Freezers
- Laboratory Fridges, Freezers and Incubators
- Walk-in Cold Stores and Freezers
- Warehouses
- Shaking Incubators

Parameter Measurement

- Validation Systems
- Temperature Measurement
- Humidity and Gases

Preventative Maintenance and Failure Modes

- Preventative Maintenance
- Monitoring Systems and Alarms
- Failure Modes and Detection

WHERE AND WHEN?

Online

Via Zoom and our training platform www.thermalcompliance.com

Onsite

At your facility, our Training Centre or one of our public hotel courses.

Our Public course dates are listed at www.thermalcompliance.co.uk

Bespoke

Our courses can be adapted to your site, our trainers can use your loads, your validation equipment and your processes.

WHO SHOULD ATTEND?

-  **VALIDATION**
-  **QUALITY ASSURANCE**
-  **ENGINEERING**

FURTHER LEARNING

We also offer the following training courses:

Introduction to Autoclaves

Advanced Autoclave Validation
